

Job Description: Software Tester Engineer Quality Assurance & Delivery

JOB PURPOSE

Software QA Engineers within SintecMedia are responsible for ensuring that our clients receive the best possible quality of software, by testing the releases for our broadcasting management software. This position may require some travelling outside of Romania.

MAIN DUTIES AND RESPONSIBILITIES

- Ensuring the best Quality and successful Delivery of E2E Customer solutions up to go-live and stabilization
- Release management for part of our product releases
- Test scripting and execution based on functional specifications
- Assist in implementation and monitoring of QA&D procedures and methodologies
- Training on the product modules and other required areas
- Consolidating the Quality Assurance and Delivery of the solutions for our customers all the way through production readiness and stabilization as basis for the Quality improvement

SKILLS AND EXPERIENCE

Required Skills

- Excellent written, interpersonal and verbal communication skills in English
- Knowledge and understanding of software development and QA lifecycle
- High degree of computer literacy
- Technical oriented skills and approach
- Knowledge of SQL, XML and .Net Client-Server testing techniques

Nice to Have

- Knowledge and understanding of QA methodologies and models
- Knowledge of automation tools and methodologies

Personal Attributes

- Ability to work in challenging international, multinational teams and manage your own time
- Self-motivated, with a high level of self-discipline
- Patience, flexibility and attention to detail
- Delivery focused, with a flexible approach to work and willingness to learn new systems and business lines
- A methodical approach to problem solving and troubleshooting
